Remark:	** The substances are tested in terms of its respective elements and the test result is based on the calculation of selected elements/ market(s) and to the worst-case scenario. Due to the limit of the analytical technology available, any further investigation is not feasible. The client is strongly advised to review the chemical formulation to ascertain.
	*** The test results for Boric acid & Disodium tetraborate, anhydrous & tetraboron disodium heptaoxide, hydrate (calculated as decahydrate) & Diboron trioxide are based on the calculation of the extracted soluble Boron, and the test results for Diarsenic pentaoxide & Diarsenic trioxide & Triethyl arsenate & Arenic acid are based on the calculation of the extracted soluble arsenic concentration.
	### The substances are UVCB (substance of unknown or variable composition, complex reaction products or biological materials), which are identified by its main constituents. Individual concentrations to the constituent of UVCB with an amount of <0.01% were not considered by the calculation of the sum. Calculation is based on the worst-case scenario. Due to the UVCB nature the reported values may be regarded as semi-quantitative.
	# only applicable with ≥0.1% of Michler's ketone (CAS No. 90-94-8) or Michler's base (CAS No. 101-61-1)
