

NEW selfadhesive film designed for WATER BASED INKS

Features:

Advantages:

- high cohesion coating
- ultra-white, matt surface
- perfectly flat product
- instant ink absorption
- fast ink stabilization
- excellent image quality
- vivid, saturated colors and high-contrast
- durability - no shrinking or curling
- high dimensional stability

Ecological aspects:

- 100% polyvinyl chloride free
- NO plasticizers and NO phthalates
- for ecological water based pigment inks
- friendly recycling process
- eco-friendly, recyclable packaging
- VOC-free production
- production technology based on European made components only, according to the best practices and latest norms and standards

Benefits during application:

- up to 50% shorter application time thanks to the use of an adhesive with increased initial tack
- much shortened training time thanks to the use of innovative technology of channel structured adhesive
- highly efficient and almost operator-free printing process thanks to the use of ultra-stable PCK backing paper
- easy peeling-off process thanks to the use of removable acrylic adhesive

Matt coating - 15g/m²

92 µm, gloss, white PP foil

High-Tack adhesive

**ultra-stable, channel structured paper,
PCK, 140g/m²**

**innovative technology
channel structured High-Tack adhesive**
